

BOYD

We are very excited to use the “Bring Your Own Device” scheme in Sixth Form. Details of the specification and advised equipment are given below.

These devices will be used to enhance learning in and out of the classroom, and will be used in a variety of ways. Students may be asked to use their device to take part in an interactive quiz during a lesson, to perform some independent research as part of an ongoing project, or to access applications which will enrich their subject knowledge.

Google Classroom will be used as the main platform where teachers will post assignments and give support, and where students can collaborate with one another. Any home learning assignments will also be posted on this platform.

Students will be shown how to access their Google Classroom, and any other linked resources, during their induction in September.

Minimum Spec

- At least a 7” screen
- At least a 5-hour battery life
- Wireless networking and internet
- Still and video camera recording facility
- At least 16Gb of storage
- At least iOS v11, Android 9 (Android Pie), Windows 10

Typical devices that would be suitable would be:

- Apple iPad/Mini Ipad
 - Android tablets such as Google Nexus, Samsung Galaxy, Asus ZenPad 8 S or 10 inch version.
