

Verulam School: Key Stage 5 CURRICULUM INFORMATION

Faculty: Business, Enterprise & Law

Head of Faculty: Mr Engel

Subject Vision for Law: The Law curriculum enables students to understand the role of Law in today's society and raises their awareness of the rights and responsibilities of individuals. Learning about legal rules and how and why they apply to real life, allows students to develop legal skills that demonstrate the ability to engage in both deep analysis and critical thinking. We aim to offer students a fascinating insight into the nature of law and how it is made and applied within the English legal system as well as the opportunity to explore a range of legal theories and cases in relation to criminal law, types of liability and negligence and human rights.
